Recessed LED Troffer

## OVERVIEW

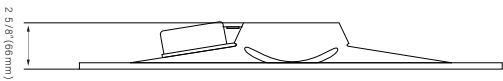

AVOVO Recessed LED Troffer has a distinctive luminous shielding that distributes gentle brightness from the sides of its central basket. This series is optimized for modular dropped ceiling grids. These troffers are ideal in place of traditional luminaries, or as new installations. The luminaire refined visual optics, superior non-glare lighting and integrated T-bar clips provide the features needed for installation, speed and flexibility. RLT series is an excellent lighting solution for commercial offices, schools, retail, hospitals and healthcare facilities.

# FEATURES

- Cold rolled steel construction with gloss white enamel finish.
- Sides and ends are hemmed in for safe, easy and handling.
- End plates contain integrated earthquake T-bar clips.
- Impact resistant PC lens with linear prisms for uniformity.
- 125 lm/w brightness LED with over 50,000 hours lifespan.
- High quality electronic driver with 0-10V dimming standard.
- Color temperature available: 4000K and 5000K.
- Mount in recessed grid ceiling.
